

National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 28, 2022 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (106 fires)
New large incidents:	6
Large fires contained:	3
Uncontained large fires: **	22
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 81 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Northwest Area (PL 2)

New fires:	30
New large incidents:	0
Uncontained large fires:	9
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Cedar Creek, Willamette NF, USFS. IMT 2 (NW Team 7) and IMT 2 (NW Team 9). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Minimal fire behavior with backing, single tree torching and smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Double Creek, Wallowa-Whitman NF, USFS. Transfer of command from IMT 1 (SA Blue Team) back to the local unit will occur tomorrow. IMT is also managing the Sturgill, Nebo, and Goat Mountain Two fires. Ten miles southeast of Imnaha, OR. Timber and grass. Minimal fire behavior with flanking, backing and single tree torching. Area, road and trail closures in effect.

Sturgill, Wallowa-Whitman NF, USFS. Fifteen miles southwest of Enterprise, OR. Timber. Minimal fire behavior with backing, single tree torching and smoldering. Area, road and trail closures in effect.

Nebo, Wallowa-Whitman NF, USFS. Twenty-one miles southeast of Enterprise, OR. Timber. Minimal fire behavior with flanking, creeping and backing. Area, road and trail closures in effect.

Goat Mountain Two, Wallowa-Whitman NF, USFS. Nine miles south of Lostine, OR. Timber. Minimal fire behavior with creeping and smoldering.

Goat Rocks, Gifford Pinchot NF, USFS. Eight miles east of Packwood, WA. Timber and closed timber litter. Moderate fire behavior with flanking, creeping and torching. Numerous residences threatened. Area, road and trail closures in effect.

Rum Creek, Medford District, BLM. Twelve miles northwest of Hugo, OR. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Numerous structures threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Irving Peak, Okanogan-Wenatchee NF, USFS. Twenty-six miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Structures threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Minnow Ridge, Okanogan-Wenatchee NF, USFS. Twenty-five miles north of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Area, road and trail closures in effect.

Kalama, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber and light slash. Moderate fire behavior with creeping, smoldering and backing. Structures threatened. Area, road and trail closures in effect.

Boulder Mountain, Northeast Region, DNR. Nine miles northwest of Cusick, WA. Timber and medium slash. No new information.

Predictive Services Discussion: Hurricane Ian will make landfall tonight as a major hurricane on the west coast of Florida likely between Fort Myers Beach and Clearwater. Tropical storm to hurricane force winds and heavy rainfall will spread across much of the Florida Peninsula, and the Weather Prediction Center has issued a High Risk (the highest level) for excessive rainfall through central and northern portions of the Florida Peninsula. Storm surge up to 12 feet is forecast on portions of the west coast of Florida stretching from just south of Tampa Bay to Bonita Beach. Elevated to critical conditions are expected across much of Louisiana, Mississippi, Alabama, Georgia, and the Florida Panhandle as sustained winds of 10-25 mph gusting 25-40 mph amid relative humidity of 15-25% develop.

Elevated to locally critical conditions are likely across northeast California, southeast Oregon, and portions of the northern Great Basin as southwest winds of 15-25 mph with gusts 25-40 mph develop amid relative humidity of 10-20% ahead of a cold front. Breezy and dry south winds are also likely across much of the northern and central Plains. Isolated to scattered thunderstorms are likely from southeast California and southern Arizona through the central Great Basin into the Colorado and southern Rockies. Showers are expected to spread across western Washington and Oregon, with less coverage in the Inland Northwest and northern Rockies.

Escape Routes – Part 2

Operational Engagement Category

Escape routes are the paths available to firefighters from their current location when exposed to danger to an area free from danger. There should always be more than one escape route available to firefighters.

Escape routes are probably the most elusive component of Lookouts, Communications, Escape Routes, and Safety Zones (LCES). Their effectiveness changes continuously. As firefighters work along the fire perimeter, fatigue and spatial separation can increase the time required to reach the safety zone.

The most common escape routes (or part of an escape route) include the fireline. On an indirect or parallel fireline, situations become more complex. Unless safety zones have been identified ahead, as well as behind, a firefighters' retreat may not be possible.

- Discuss how you would judge the effectiveness of an escape route. Have you ever timed yourself using an escape route?
- Describe an instance when you were uncomfortably distant from your escape routes.
- Describe a method you have used to communicate the location of an escape route to your crews.
