

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 29, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (97 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires: **	22
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 81 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Northwest Area (PL 2)

New fires:	6
New large incidents:	0
Uncontained large fires:	9
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Cedar Creek, Willamette NF, USFS. IMT 2 (NW Team 7) and IMT 2 (NW Team 9). Fifteen miles east of Oakridge, OR. Timber and closed timber litter. Minimal fire behavior with backing, creeping and smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Double Creek, Wallowa-Whitman NF, USFS. Transfer of command from IMT 1 (SA Blue Team) back to the local unit will occur today. IMT is also managing the Sturgill, Nebo, and Goat Mountain Two fires. Ten miles southeast of Imnaha, OR. Timber and grass. Minimal fire behavior with short crown runs, uphill runs and flanking. Area, road and trail closures in effect.

Sturgill, Wallowa-Whitman NF, USFS. Fifteen miles southwest of Enterprise, OR. Timber. Minimal fire behavior with flanking, backing and creeping. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

Nebo, Wallowa-Whitman NF, USFS. Twenty-one miles southeast of Enterprise, OR. Timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

Goat Mountain Two, Wallowa-Whitman NF, USFS. Nine miles south of Lostine, OR. Timber. Minimal fire behavior with backing, creeping and smoldering. Last narrative report unless significant activity occurs.

Goat Rocks, Gifford Pinchot NF, USFS. Eight miles east of Packwood, WA. Timber and closed timber litter. Minimal fire behavior with flanking, backing and creeping. Numerous residences threatened. Area, road and trail closures in effect.

Rum Creek, Medford District, BLM. Twelve miles northwest of Hugo, OR. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

White River, Okanogan-Wenatchee NF, USFS. Twenty-three miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Numerous structures threatened. Area, road and trail closures in effect.

Irving Peak, Okanogan-Wenatchee NF, USFS. Twenty-six miles northwest of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Structures threatened. Area, road and trail closures in effect.

Minnow Ridge, Okanogan-Wenatchee NF, USFS. Twenty-five miles north of Leavenworth, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Kalama, Gifford Pinchot NF, USFS. Six miles north of Cougar, WA. Timber and light slash. Moderate fire behavior with creeping, smoldering and backing. Structures threatened. Area, road and trail closures in effect.

Boulder Mountain, Northeast Region, DNR. Nine miles northwest of Cusick, WA. Timber and medium slash. No new information. Last report unless new information is received.

Predictive Services Discussion: Tropical Storm Ian will track north-northeast from the Florida Peninsula towards the South Carolina coast. However, heavy rain and flooding remain expected across the northern half of the Florida Peninsula into far southeast Georgia, with tropical storm force winds near Ian's center. Elevated to locally critical fire weather conditions are expected across far southwest Georgia, southern Alabama, the western Florida Panhandle, southern Mississippi, and southern Louisiana as north-northeast sustained winds of 10-25 mph gusting 20-40 mph amid minimum relative humidity of 15-35% develop. Dry and breezy conditions are also likely in portions of the High Plains and western and central Great Basin. Showers will overspread portions of the Northwest into the northern Rockies, while isolated to scattered thunderstorms are likely from southeast California and southern Arizona northward into Utah, Colorado, Wyoming, and the northern Rockies. Cooler temperatures will spread east and south from the Pacific Northwest through the northern Great Basin and central Montana behind a cold front.

Escape Routes – Part 3

Operational Engagement Category

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following while discussing escape from possible entrapment.

- Have a plan that includes trigger points.
 - **Trigger Point:** An observable event that triggers a pre-determined action.
Example: If the temperature reaches 98 °F and relative humidity (RH) goes into single digits, the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
 - Does access to escape routes become more difficult as the day progresses?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
- During an escape, time will be short. Describe considerations in this situation such as:
 - Maintain all critical equipment such as personal protective equipment (PPE) and radio. Discard gear that will not aid in your escape.
 - Maintain contact with all other crewmembers.
- Describe a good safety zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to safety zones and deployment areas.
