## Southern Area (PL 2)

Fire Activity and Teams Assigned

## Total

New fires: 502
New large incidents: 41
Uncontained large fires: 20

* Cypress Camp Trail, Big Cypress National Preserve, NPS. Twenty miles east of Naples, FL. Southern rough and grass. Moderate fire behavior with flanking, backing and isolated torching. Structures threatened. Area and trail closures in effect.

Last Resort, North Carolina Forest Service. Nine miles south of Creswell, NC. Southern rough. Moderate fire behavior with smoldering. Reduction in acreage due to more accurate mapping.

* 600 Road, Oklahoma DOF. Two miles northeast of Longdale, OK. Grass and timber. Minimal fire behavior with creeping, smoldering and single tree torching.
* Bent Willow, Texas A\&M Forest Service. Started on private land eight miles northwest of Amarillo, TX. Grass. Minimal fire behavior with smoldering.
* Red - Army Trail, Daniel Boone NF, USFS. Twelve miles southeast of Manchester, Kentucky. Timber. Moderate fire behavior with smoldering. Structures threatened.
* HWY 123, Osage Agency, BIA. Five miles north of Barnsdall, OK. Grass and timber. Active fire behavior with wind-driven runs, running and creeping. Numerous structures threatened.
* Zink, Osage Agency, BIA. Twelve miles northeast of Prue, OK. Grass and timber. Active fire behavior with running, wind-driven runs and uphill runs. Structures threatened. Evacuations in effect.
* Hominy Jail, Osage Agency, BIA. Six miles northwest of Hominy, OK. Timber. Moderate fire behavior with creeping and smoldering. Residences threatened.
* Goad, Osage Agency, BIA. Eight miles northwest of Skiatook, OK. Grass and timber. Moderate fire behavior with creeping and smoldering. Structures threatened.
* Bradley Farm Road, Virginia DOF. Ten miles north of Aylett, VA. Timber and brush. Minimal fire behavior with creeping and smoldering. Structures threatened.
* Cowley, Osage Agency, BIA. Six miles northeast of Grainola, OK. Grass and timber. Active fire behavior with wind-driven runs, backing and creeping. Structures threatened.
* Timber Hill, Osage Agency, BIA. Five miles west of Pawhuska, OK. Grass and timber. Moderate fire behavior with wind-driven runs, backing and creeping. Structures threatened.
* Chief, Osage Agency, BIA. Two miles southeast of Burbank, OK. Grass and timber. Moderate fire behavior with wind-driven runs, backing and creeping. Structures threatened.
* Bennet Pens, Osage Agency, BIA. Eight miles northwest of Hominy, OK. Grass and timber. Moderate fire behavior with creeping and smoldering.
* Moore, Osage Agency, BIA. Pawhuska, OK. Grass. Minimal fire behavior with smoldering. Residences threatened.
* North Drum, Osage Agency, BIA. Four miles north of Wynona, OK. Grass and timber. Active fire behavior with creeping and backing. Residences threatened.
* Hickey, Osage Agency, BIA. One mile north of Bowring, OK. Timber and grass. Minimal fire behavior with creeping and smoldering. Numerous structures threatened.

Blackoak, Wewoka Agency, BIA. Five miles southwest of Wewoka, OK. Hardwood litter and grass. Minimal fire behavior with smoldering. Structures threatened.

Double Gate, Florida Forest Service. Ten miles west of Daytona Beach, FL. Timber and brush. Active fire behavior with backing, running and flanking. Area and trail closures in effect.

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

## Predictive Services Discussion:

Hot, dry, and unstable conditions will continue across the Florida Peninsula today with high-risk significant fire potential. Sea breezes in the afternoon gusting to 30 mph will create added concerns as well. Fire weather conditions are expected to modify across Florida into early next week with higher relative humidity and scattered thunderstorms bringing rainfall by mid-next week. However, fuels are likely to remain dry, with low to moderate significant fire potential to continue, and new ignitions from lightning are possible as well. To the north, widespread rainfall is forecast across the Southeast into Saturday, with more rain possible mid-next week.

Breezy winds are forecast across portions of the southern and central High Plains today. Improving conditions are forecast this weekend into early next week due to higher relative humidity and lighter winds, but elevated to critical fire weather conditions are forecast to return mid-next week along with increasing significant fire potential. Much of Virginia into New England is forecast to remain dry for the next week, with significant fire potential will remain low to moderate across Virginia, and significant fire potential increasing for the rest of the Mid-Atlantic and southern New England.

Periods of light to moderate precipitation are forecast for the northern half of the West, briefly interrupted by a dry and warm spell Sunday into Monday. Southern California, the southern Great Basin, and Southwest are forecast to remain dry into mid-next week, with breezy to windy conditions likely for the southern Great Basin and Southwest mid-next week. Light precipitation may return to California late next week as well.
