

**Incident Management Situation Report
Friday, April 28, 2023 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (April 21, 2023 – April 27, 2023):

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (816 Fires)
New large incidents:	19
Large fires contained:	23
Uncontained large fires: **	13
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there are zero fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Southern Area (PL 2)

Fire Activity and Teams Assigned	Total
New fires:	133
New large incidents:	10
Uncontained large fires:	8
CIMT Committed:	1

* **Great Lakes**, National Forests in North Carolina, USFS. CIMT (SA Red Team). One mile southeast of New Bern, NC. Chaparral, dormant brush, hardwood slash and timber. Minimal fire behavior with backing, creeping and smoldering. Communities and numerous structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

* **Radar Hill**, Osage Agency, BIA. One mile west of Bartlesville, OK. Timber. Moderate fire behavior with running and backing.

* **North Side**, Oklahoma DOF. Three miles east of Peggs, OK. Hardwood litter. Moderate fire behavior.

* **Grey Squirrel Hollow**, Oklahoma DOF. Four miles northeast of Proctor, OK. Hardwood litter. Moderate fire behavior.

* **Aggie Flats**, Oklahoma DOF. Four miles northeast of Peggs, OK. Hardwood litter. Active fire behavior.

* **Curry Island**, Florida Forest Service. Started on private land one mile south of Lakeport, FL. Grass and brush. Moderate fire behavior with short-range spotting and creeping.

Swine, Wewoka Agency, BIA. One mile southwest of Wewoka, OK. Timber. Minimal fire behavior with smoldering.

County Road 121, Florida Forest Service. Started on private land two miles northwest of Ingle, FL. Heavy slash and southern rough. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday.

Acres (2013 – 2022 as of today)	708,513

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Widespread rainfall is expected from the Southeast extending along and east of the Appalachians through the weekend. Dry and breezy post-frontal conditions are likely from east Texas through the Southeast Sunday – Monday, but antecedent rainfall should minimize increases in significant fire potential. Much of the eastern US will be cooler and drier next week. Post-frontal dry and breezy conditions are likely to increase significant fire potential in parts of Missouri and Iowa this weekend and through the western Mississippi Valley into next week, where precipitation is forecast to be little to none.

Showers and thunderstorms, including severe thunderstorms, are expected across the eastern half of Texas into the ArkLaTex and Oklahoma today, with dry and breezy post-frontal conditions on portions of Plains this weekend. Moisture will push west to the Rockies by mid-next week increasing chances of precipitation from the Colorado Rockies south along and east of the Divide through New Mexico onto portions of the southern and central High Plains. Dry and breezy conditions are likely to expand from the Southwest into the southern and western Great Basin and eastern California this weekend through early next week. Above normal temperatures are expected across much of the West through the weekend as upper-level ridging builds overhead. An upper-level trough is likely to move onto the West Coast late this weekend through early next week increasing precipitation chances on the West Coast and northern Intermountain West next week.
