[Understanding the IMSR](#)

On August 6, a helicopter on contract with Cal Fire crashed while engaged on the Broadway fire in southern California. The pilot and two firefighters were fatally injured. The firefighting community extends its condolences to the family and friends of the deceased.

Two incident management teams, five fire suppression crews, 10 engines and 19 overhead personnel are assigned to large fire support in Canada.

One MAFFS C-130 airtanker and support personnel from the 153rd Airlift Wing (Wyoming Air National Guard) and one MAFFS unit from the 302nd Airlift Wing (Colorado Air Force Reserve) have been deployed to Klamath Falls, OR to support wildland fire operations nationally.

Predictive Services Discussion:

An upper-level trough will move east-southeast from the northern Great Basin through the central Rockies, with hot, dry, and windy conditions expected again from the deserts of southern California through the greater Four Corners region. Hot, dry, and breezy conditions will continue across much of Texas into the Lower Mississippi Valley as well. Strong easterly winds of 30-45 mph, gusting 65+ mph will continue for Hawaii through tomorrow night, with fire weather concerns on leeward locations of the islands. Post-frontal dry and windy conditions are expected along and east of the Appalachians, but antecedent rainfall will help mitigate fire weather conditions. Scattered mixed wet and dry thunderstorms are expected across much of the Southwest onto the southern High Plains, and isolated showers and thunderstorms are likely in portions of southern California in the evening and overnight as moisture from Tropical Storm Eugene streams northward. Isolated to scattered showers and mixed wet and dry thunderstorms are likely from north and eastern Idaho and western Montana through Wyoming onto the central Plains. Showers are likely to move into western Washington and northwest Oregon overnight as another upper-level trough approaches, but offshore winds are likely in southwest Oregon ahead of this during the day. Scattered to widespread thunderstorms are likely from the northern and central Plains through much of the Southeast, with showers and thunderstorms in the Northeast.
