[Understanding the IMSR](#)

The Federal Emergency Management Agency (FEMA) has activated Emergency Support Function 4 (ESF4) to assist with the wildfires burning in Hawaii.

Two incident management teams and two overhead personnel are assigned to large fire support in Canada.

One MAFFS C-130 airtanker and support personnel from the 153rd Airlift Wing (Wyoming Air National Guard) and one MAFFS unit from the 152nd Airlift Wing (Nevada Air National Guard) have been deployed to Klamath Falls, OR to support wildland fire operations nationally.

Predictive Services Discussion:

Some moderation is expected in the West with more substantial cooling over the Northern Rockies and more widespread showers and wet thunderstorms over the Great Basin. It will remain warm and dry over North Ops and much of the Northwest, but winds will decrease. Minimum humidity will still fall to 15% to 25% over a wide area, with some poor recoveries continuing in the midslopes and higher. Another round of isolated mixed wet and dry thunderstorms is expected over northern California, interior Oregon, and Idaho. As Hurricane Hilary begins to move closer to the US, scattered to widespread showers and wet thunderstorms are expected across southern California and western portions of the Four Corners states. However, New Mexico and Colorado will trend hotter and drier, and southerly winds will start to pick up as well. Hot and dry weather will continue over Texas, Oklahoma, and Louisiana. Further warming is also expected over the Plains states, with hotter and windier weather for much of the Mississippi and lower Missouri Valleys. It will remain cooler and mainly dry over the eastern Great Lakes and Northeast, while the Southeast will turn warmer and mostly dry aside from thunderstorms in Florida. Temperatures will remain near to below normal in most of Alaska, with showery weather over some interior portions of the state and some areas of breezy conditions.
