## Predictive Services Discussion:

Isolated to scattered mixed wet and dry thunderstorms will continue this morning across western Washington and northwest Oregon, while isolated to scattered thunderstorms are likely to develop in the afternoon and evening from the Cascades eastward into Idaho and western Montana. Dry and breezy conditions are likely from northeast California into portions of south-central Oregon as well. Isolated to scattered thunderstorms are likely in portions of south and east Texas into Louisiana, southern Mississippi, and southern Alabama, but there is concern for lightning ignitions as very hot and relatively dry conditions continue across much of the southern Plains, Texas, and Southeast. Monsoonal thunderstorms will continue over much of the Four Corners states, with widespread thunderstorms over Colorado. Thunderstorms are likely to move over and develop on the central Plains as well, while scattered showers and thunderstorms are likely from the Great Lakes into the Mid-Atlantic and Northeast.
