Nationally, there are six fires being managed under a strategy other than full suppression.
**Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area Reports

## Understanding the IMSR

Five incident management teams, 16 fire suppression crews, 100 smokejumpers and 33 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

| GACC | Incidents | Cumulative Acres | Crews | Engines | Helicopters | Total Personnel | Change in Personnel |

## Predictive Services Discussion:

Hot and dry conditions will continue across much of California, and the Southwest, with temperatures exceeding $110^{\circ} \mathrm{F}$ across portions of California and Arizona. Above normal temperatures will also continue across the rest of the West into the Plains. Breezy west to southwest winds are forecast across much of the Great Basin and Arizona, with elevated to locally critical conditions across the southern Great Basin and western Arizona. Isolated mixed wet and dry thunderstorms are forecast for much of northern and eastern Idaho into western Montana and Wyoming. Scattered wetter thunderstorms are expected along the Front Range of the Rockies into the Plains with severe thunderstorms possible in eastern Montana and the Dakotas. Showers and thunderstorms are also likely for the Appalachians to the East Coast with the most widespread rainfall in the Mid-Atlantic and Northeast. Much of Alaska will be cooler today with scattered showers except for the eastern Interior and North Slope where above normal temperatures will continue.

## National Predictive Services Outlooks

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is 2023 Week of Remembrance Day 4
