## Predictive Services Discussion:

Scattered to widespread mixed wet and dry thunderstorms are expected in southeast Arizona and southwest New Mexico, with more isolated thunderstorm coverage into the Four Corners. Isolated mixed wet and dry thunderstorms are also possible in far northeast Washington into northwest Montana. Dry and breezy conditions are likely across portions of the Great Basin into southeast California, the West Slope, Wyoming, and southeast Idaho into southwest Montana. Lingering dry and breezy conditions are also likely in and around the Columbia Gorge too. Thunderstorms are likely across the northern into the central Plains and Midwest and from eastern Oklahoma into the Deep South and central Gulf Coast. Lingering showers and thunderstorms are likely in the eastern Great Lakes and New England. Warm and dry conditions will continue today across the eastern Interior and Copper Basin, with near to above normal temperatures, although a few isolated thunderstorms are possible near the Canadian border.

National Predictive Services Outlooks
