Nationally, there are six fires being managed under a strategy other than full suppression. **Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area Reports

## Understanding the IMSR

Four incident management teams, 14 fire suppression crews, 60 smokejumpers and 75 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

## Predictive Services Discussion:

Isolated to scattered mixed wet and dry thunderstorms will develop across southeast Arizona into southwest New Mexico with scattered wet thunderstorms from the New Mexico central mountain chain into the southern High Plains. Isolated mixed wet and dry thunderstorms are also possible in far northeast Washington into northwest Montana. Dry and breezy conditions are likely across portions of the Columbia Basin, northern Great Basin, and West Slope. Hot, above normal temperatures will continue across much of the southern Plains, Texas, and the Desert Southwest. Thunderstorms are likely across much of the Plains from the Canadian border to the Texas Panhandle and Oklahoma then eastward through the Mississippi Valley and Appalachians to the East Coast. Severe thunderstorms are most likely in the central High Plains and from the Upper Ohio Valley into the Northeast. Warm and dry conditions will return to much of the central and eastern Interior with showers returning to western Alaska.
