Nationally, there are seven fires being managed under a strategy other than full suppression. **Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area Reports

## Understanding the IMSR

Five incident management teams, 11 fire suppression crews, 40 smokejumpers, 12 rappellers and 60 overhead personnel and are assigned to large fire support in Canada.

## Predictive Services Discussion:

Very hot, record-setting temperatures will continue across much of California, the Great Basin, and Southwest, with well above normal temperatures stretching into the Northwest and northern Rockies. Very low relative humidity is forecast for much of the West, with minimums in the single digits and teens, while mid-slopes and ridges will have poor overnight recovery of less than $40 \%$. Winds will increase across the east slopes of the Cascades into the Columbia Basin with elevated conditions. Isolated, mainly dry thunderstorms will develop across far southeast Arizona into southwest and central New Mexico, with isolated dry thunderstorms likely to develop after midnight tonight across northeast California, northwest Nevada, and north Idaho. Thunderstorms will also develop across much of the central and southern Plains to the East Coast, with severe thunderstorms possible in the Mid-Mississippi Valley and Mid-Atlantic. Much of Texas will remain hot and dry with breezy south winds creating areas of elevated fire weather conditions. Eastern Interior Alaska will be seasonally warm and dry today while showers continue across southwest and south-central Alaska.

National Predictive Services Outlooks

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Firefighter Nutrition.
