Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

## Predictive Services Discussion:

Isolated to scattered mixed wet and dry thunderstorms will continue across the Southwest extending into southern California, southwest Texas, and the greater Four Corners region. Isolated mixed wet and dry thunderstorms are also possible across the northern Great Basin into southwest Montana, and there is potential for isolated thunderstorms in Nevada, including Nevada into southern Idaho overnight. Hot, dry, and breezy conditions will develop along and east of the Cascades and the Sierra into the central and northern Great Basin and portions of the Inland Northwest, especially in and near the Columbia Gorge. Well above normal temperatures will continue across much of the West, northern Plains, and portions of Texas and South Florida. Strong to severe thunderstorms are expected from south Texas to the southeast Atlantic Coast, especially along the Gulf Coast, with showers and scattered thunderstorms from the Great Lakes and Midwest into the Mid-Atlantic. Well above normal temperatures and scattered wet thunderstorms will continue over the Alaska Interior.

## National Predictive Services Outlooks

## 6 Minutes for Safety:
