Nationally, there are three fires being managed under a strategy other than full suppression.
**Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area daily reports

## Understanding the IMSR

Twelve fire suppression crews and eleven overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday - Friday at 0730 Mountain time unless significant activity occurs.

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

## Predictive Services Discussion:

A cold front will push south into the Southeast and west onto the Plains today. Isolated to scattered showers and thunderstorms are likely near the front from the Dakotas through the Missouri and Ohio Valleys and into portions of the Southeast. Dry and breezy post-frontal conditions are expected across much of the Great Lakes into the Mid-Atlantic, and smoke will continue to move south from Quebec into the Great Lakes, Northeast, and MidAtlantic. Dry and breezy conditions are also expected across portions of the southern Great Basin and Arizona into New Mexico. Mostly scattered thunderstorms and showers will continue from central and northern California through southern and eastern Oregon and the northern Great Basin, and severe thunderstorms are possible from northern California through southern Oregon into Idaho. Much of the Rockies and High Plains will have showers and thunderstorms develop as well, including potentially heavy rain and severe thunderstorms in the southern Rockies and southern High Plains. Isolated to scattered thunderstorms are likely from the Gulf and southeast Atlantic Coasts into Texas and the Deep South. Warm and dry conditions will continue across eastern portions of Alaska, including gusty gap winds in portions of the Interior.

National Predictive Services Outlooks

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Proper Use of Trigger Points
