

**Incident Management Situation Report
Tuesday, June 13, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (127 fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires: **	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there are two fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Thirteen fire suppression crews, two incident management teams and six overhead personnel are assigned to support large fires in Canada.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

Ten Year Average	Total
Fires (2013 – 2022 as of today)	23,478
Acres (2013 – 2022 as of today)	1,230,376

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry and windy weather will lead to critical fire weather conditions and moderate to high-risk significant fire potential in southern New Mexico and far west Texas. Breezy and dry conditions are also expected across the Columbia Basin ahead of a cold front. An upper low will slowly move from the Great Lakes into the Northeast, while an associated cold front stalls in the Lower Mississippi Valley and Southeast. Dry and breezy post-frontal conditions are likely in portions of Minnesota while showers and thunderstorms develop across portions of the Great Lakes. Scattered to widespread showers and thunderstorms, some severe, will develop near the front from Oklahoma and northeast Texas into Georgia. Scattered showers and thunderstorms will continue from the Sierra through much of the central and northern Intermountain West and Rockies. Cool and showery weather is forecast across southwest and south-central Alaska, with seasonable temperatures and dry conditions forecast for the central and eastern Interior.
