Nationally, there are two fires being managed under a strategy other than full suppression. **Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area daily reports

## Understanding the IMSR

Seventeen fire suppression crews, two incident management teams and eighteen overhead personnel are assigned to support large fires in Canada.

This report will post Monday - Friday at 0730 Mountain time unless significant activity occurs.

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

## Predictive Services Discussion:

Windy and dry conditions creating moderate to high-risk significant fire potential will develop across southeast Arizona into southern New Mexico and the Trans Pecos today. Dry conditions with minimum relative humidity below 30\% will also develop across northeast Minnesota and portions of Virginia into North Carolina this afternoon. Scattered showers and thunderstorms will develop across much of Utah, Wyoming, and Colorado, spreading into the northern High Plains. Scattered to widespread showers and thunderstorms, some severe, are likely from the central Plains into the northern Gulf Coast. An upper low will continue to bring scattered showers and isolated thunderstorms to the eastern Great Lakes and Northeast while the Northwest and Northern California remain cool and dry. Cool and moist conditions will continue for the south cast of Alaska while the Interior remains dry with a warming trend.

National Predictive Services Outlooks

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Helicopter Landing Zone Selection
