

**Incident Management Situation Report  
Friday, June 16, 2023 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Total</b>
Initial attack activity:	Light (104 fires)
New large incidents:	2
Large fires contained:	1
Uncontained large fires: **	8
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
<a href="#">Complex IMTs</a> committed:	0

Nationally, there are two fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires only include fires being managed under a full suppression strategy.

**[Geographic Area daily reports](#)**

**[Understanding the IMSR](#)**

Twelve fire suppression crews, two incident management teams and eighteen overhead personnel are assigned to support large fires in Canada.

**This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.**

**Active Incident Resource Summary**

**Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Daily dry and windy weather will lead to elevated and locally critical fire weather conditions and moderate to high-risk significant fire potential from southeast Arizona through southern New Mexico into southwest Texas. Well above normal temperatures will spread across much of Texas with increasing significant fire potential. A cold front will move through the Northeast and Mid-Atlantic today and Saturday, with scattered to numerous showers and thunderstorms, while dry and breezy conditions develop behind the front this weekend. Significant fire potential will be highest across Michigan, Virginia, and North Carolina in these dry post-frontal conditions.

Isolated to scattered thunderstorms are expected in the southern Great Basin and central Rockies today with drier conditions over the weekend. Showers and thunderstorms, some severe, will develop over the central Plains today, and gradually move south and east into the Lower and Mid-Mississippi Valley and Deep South by Sunday. Scattered showers and thunderstorms are also likely in the northern Plains into Minnesota this weekend. A cold upper low will move into the Northwest late this weekend, with showers west of the Cascades and scattered showers and thunderstorms in the northern Rockies. A warming and drying trend is forecast for much of Alaska except for isolated showers and thunderstorms over portions of the Interior through Saturday.
