

**Incident Management Situation Report
Wednesday, June 21, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (86 fires)
New large incidents:	4
Large fires contained:	3
Uncontained large fires: **	7
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there are four fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Three incident management teams, 20 fire suppression crews, 38 smokejumpers and 25 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Fires (2013 – 2022 as of today)	24,816
Acres (2013 – 2022 as of today)	1,443,203

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry and breezy weather will continue across much of the Southwest into portions of the southern Great Basin, southeast California, and West Slope leading to elevated fire weather conditions. Warm and dry conditions will persist in much of the Great Lakes, with minimum relative humidity below 35% in northern Michigan, Minnesota, and Wisconsin. Hot and dry conditions will continue across much of Texas into Louisiana with relative humidity below 20% in much of south and west Texas. Severe thunderstorms are likely on much of the southern and central High Plains into north and central Texas and the Dakotas. Mostly below normal temperatures remain across the West, with isolated to scattered showers and thunderstorms in the northern Intermountain West onto the northern Plains. Widespread showers and thunderstorms will continue in much of the Southeast, southern Appalachians, and Mid-Atlantic, with heavy rain and flooding likely from the Florida Panhandle through the eastern slopes of the southern Appalachians. Scattered showers are likely across southern Alaska into the Interior and on the North Slope, with below normal temperatures in the northern half of Alaska and above normal temperatures across the southern half.
