Nationally, there are five fires being managed under a strategy other than full suppression. **Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area daily reports

## Understanding the IMSR

Three incident management teams, 22 fire suppression crews, 40 smokejumpers and 24 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

* Post, Southeast District, Arizona DOF. Six miles southwest of Benson, AZ. Grass and brush. Extreme fire behavior with wind-driven runs and short-range spotting. Numerous structures threatened. Evacuations in effect.
* Wildhorse, Southeast District, Arizona DOF. Ten miles south of Sierra Vista, AZ. Grass and brush. Active fire behavior with running and creeping.
* Goldwater, Phoenix District, BLM. Twenty miles southeast of Gila Bend, AZ. Grass and brush. Minimal fire behavior with creeping.

Oak, Coronado NF, USFS. Eighteen miles northeast of Patagonia, AZ. Grass and brush. Minimal fire behavior.
Rico, Las Cruces Field Office, BLM. One mile north of Pinos Altos, NM. Light slash and timber. No new information.

McGregor, Las Cruces Field Office, BLM. Eight miles southeast of Timberon, NM. Grass and brush. No new information.

Wilbur, Coconino NF, USFS. Twenty-two miles east of Camp Verde, AZ. Timber. Minimal fire behavior with creeping and smoldering. Area and trail closures in effect. Last narrative report unless significant activity occurs.

Ridge, Kaibab NF, USFS. Previously reported incident. Eight miles southeast of Tusayan, AZ. Timber. Moderate fire behavior with backing. Structures threatened. Last narrative report unless significant activity occurs.

## Predictive Services Discussion:

Widespread dry and windy weather will continue across the Southwest, southern Great Basin, West Slope, and southeast California leading to elevated and critical fire weather conditions, including moderate to high-risk significant fire potential in the Southwest. Warm and dry conditions will persist in much of the Great Lakes, with minimum relative humidity below $35 \%$ in northern Michigan and much of Wisconsin, but showers and thunderstorms are likely in much of Minnesota. Hot temperatures will continue in south and west Texas, and isolated to scattered mixed wet and dry thunderstorms are likely with new ignitions possible. Showers and thunderstorms are expected across much of the central and northern Plains into north Texas, with severe thunderstorms from the Black Hills south to the Texas Panhandle. Isolated thunderstorms are likely over the mountains in northern California, the Cascades, and northern Great Basin, with scattered showers and thunderstorms in the northern Rockies. Scattered to widespread showers and thunderstorms are expected in much of the Southeast, southern Appalachians, and Mid-Atlantic. Scattered showers will continue across the southern half to two-thirds of Alaska.

National Predictive Services Outlooks

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Safety Zones 2 (LCES)
