

**Incident Management Situation Report
Monday, June 26, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (79 fires)
New large incidents:	0
Large fires contained:	3
Uncontained large fires: **	2
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there are six fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Six incident management teams, 23 fire suppression crews, 40 smokejumpers and 26 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

Acres (2013 – 2022 as of today)	1,623,365

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

High pressure will continue to build over the South-Central United States for another day of near record high temperatures in the Southwest, Texas, Oklahoma, Louisiana, and Mississippi. Relative Humidity will reach single digits in the Southwest and much of Texas, and a low-pressure system moving inland off the Pacific will induce strong winds of 20 – 25 mph, gusting to 35 – 40 mph over much of the Southwest and the Four Corners Regions. A potential also exists for isolated dry thunderstorms in portions of western New Mexico and eastern Arizona. The Pacific Northwest, Northern Great Basin, and Rocky Mountains are also likely to see isolated to scattered thunderstorms with a slight chance of severe thunderstorms developing in the central High Plains. The Great Lakes Region will continue to receive scattered to widespread showers and thunderstorms as a low-pressure center continues to track slowly eastward over the region. Scattered showers are likely to develop across the Ohio Valley and in portions of the Lower Mississippi Valley as well. There is potential for severe thunderstorms and heavy rain over the middle and southern Atlantic Coast States. Alaska will be mostly cool and showery with the interior receiving isolated wet thunderstorms.
