

**Incident Management Situation Report  
Tuesday, May 9, 2023 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity (May 5, 2023 – May 8, 2023):**

<b>Fire Activity and Teams Assigned</b>	<b>Total</b>
Initial attack activity:	Light (159 Fires)
New large incidents:	3
Large fires contained:	8
Uncontained large fires: **	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
<a href="#">Complex IMTs</a> committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires only include fires being managed under a full suppression strategy.

**[Geographic Area daily reports](#)**

**[Understanding the IMSR](#)**

**This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.**

**Active Incident Resource Summary**

## **Predictive Services Discussion:**

Elevated to locally critical fire weather conditions are expected today from Arizona through much of New Mexico and into southern Colorado due to dry and windy weather. Isolated dry thunderstorms, capable of severe wind gusts, are also likely in portions of the Trans Pecos onto the southern High Plains. Greater chances and coverage of severe thunderstorms are forecast across the central High Plains extending farther east through southern Kansas and northern Oklahoma. Dry post-frontal conditions will continue across New England, with warm, dry, and unstable conditions on the Florida Peninsula. Isolated to scattered thunderstorms are likely from Texas through the Southeast into the Mid-Atlantic, including severe thunderstorms in the coastal Carolinas. Scattered showers and thunderstorms are also likely from the northern Rockies through the northern Plains.
