Incident Management Situation Report Wednesday, May 10, 2023 – 0730 MDT National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (125 Fires)
New large incidents:	2
Large fires contained:	0
Uncontained large fires: **	6
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there is one fire being managed under a strategy other than full suppression. **Uncontained large fires only include fires being managed under a full suppression strategy.

Geographic Area daily reports

Understanding the IMSR

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

Southern Area (PL 2)

Fire Activity and Teams Assigned	Total
New fires:	9
New large incidents:	1
Uncontained large fires:	3

Sandy, Big Cypress National Preserve, NPS. Twenty-two miles northeast of Carnestown, FL. Southern rough, tall grass and hardwood litter. Active fire behavior with wind-driven runs, short-range spotting and running. Structures threatened. Area and trail closures in effect.

Great Lakes, National Forests in North Carolina, USFS. One mile southeast of New Bern, NC. Chaparral, dormant brush, hardwood slash and timber. Minimal fire behavior with smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Orange Hammock, Florida Forest Service. Started on private land 2 miles southwest of Port Orange, FL. Timber and southern rough. No new information. Last report unless new information is received.

* **Major**, National Forests in Florida, USFS. Ten miles northwest of Astor, FL. Southern rough. Moderate fire behavior with running, backing and isolated torching. Structures threatened. Last narrative report unless new information is received.

Fires (2013 – 2022 as of today)	18,120
Acres (2013 – 2022 as of today)	830,006

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Critical fire weather conditions and moderate to high-risk significant fire potential are forecast from eastern Arizona through much of New Mexico into far southwest Texas and southern Colorado due to dry and windy weather. Very low relative humidity and occasional breezy winds are expected in New England leading to moderate significant fire potential. Hot, dry, and unstable conditions are expected across south Florida, with isolated to scattered afternoon thunderstorms capable of strong wind gusts likely on the Florida Peninsula. Strong to severe thunderstorms are expected across the High Plains and along the Front Range, with the greatest chances and coverage of severe thunderstorms from southeast Montana into the Texas Panhandle. Isolated to scattered thunderstorms and showers are also likely in the Pacific Northwest and the eastern Great Basin through the central Rockies, with greater coverage of thunderstorms on the Plains through Texas and the Gulf Coast.
