National Fire Activity (May 19, 2023 - May 21, 2023):

| Fire Activity and Teams Assigned | Total |
| :--- | :---: |
| Initial attack activity: | Light (206 fires) |
| New large incidents: | 4 |
| Large fires contained: | 1 |
| Uncontained large fires: ** | 6 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 0 |
| Complex IMTs committed: | 1 |

Nationally, there are three fires being managed under a strategy other than full suppression. **Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area daily reports

## Understanding the IMSR

Thirteen fire suppression crews, three incident management teams and twenty-five overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday - Friday at $\mathbf{0 7 3 0}$ Mountain time unless significant activity occurs.
Active Incident Resource Summary

## Predictive Services Discussion:

Post-frontal dry and cool conditions will spread across much of New England, especially Maine, today with minimum RH dropping below $30 \%$ in places. RH is likely to drop below $35 \%$ in parts of northern Minnesota as well. Dry conditions will begin to develop over southern New Mexico and Arizona, but isolated to scattered thunderstorms remain likely from northern Arizona and New Mexico extending north through the Intermountain West and in the southern Sierra. Severe thunderstorms are likely in western and central Montana and from the Big Bend through the Oklahoma and Texas Panhandles. Scattered to widespread thunderstorms are expected over much of Florida, Georgia, Alabama, and into Mississippi and Tennessee.

National Predictive Services Outlooks
