

**Incident Management Situation Report
Wednesday, May 24, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (119 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires: **	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there are three fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Thirteen fire suppression crews, three incident management teams and twenty-five overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

Acres (2013 – 2022 as of today)	955,317

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry and breezy conditions will continue in the eastern Sierra and east of the Transverse and Peninsular Ranges in southern California into southern Nevada and extend across portions of the Southwest, including minimum relative humidity of 8-20% and wind gusts of 30-50 mph. A cold front will push south and east through the Northeast and Ohio Valley, with isolated to scattered showers and thunderstorms across most of New England. Severe thunderstorms are likely on the southern and central High Plains and on the Florida Peninsula, and thunderstorms are forecast along much of the Gulf Coast into central Texas and onto the southern and central Plains. Isolated to scattered thunderstorms are also likely in portions of the central Intermountain West, including possible severe thunderstorms stretching from the northern Great Basin into central Montana. Flood Watches and Warnings will continue across parts of Alaska, especially in the Interior, for snowmelt, and gusty southerly winds are expected through the Alaska Range.
