Nationally, there are four fires being managed under a strategy other than full suppression.
**Uncontained large fires only include fires being managed under a full suppression strategy.

## Geographic Area daily reports

## Understanding the IMSR

Seventeen fire suppression crews, three incident management teams and thirty-three overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday - Friday at 0730 Mountain time unless significant activity occurs.

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

## Predictive Services Discussion:

Dry and breezy conditions will continue in the eastern Sierra and east of the Transverse and Peninsular Ranges in southern California into southern Nevada and extend across portions of the Southwest. Dry post-frontal conditions are likely across portions of the Great Lakes into the Northeast and Mid-Atlantic, with thunderstorms continuing over the Florida Peninsula and along the southeast Atlantic Coast. Severe thunderstorms are likely again on the southern and central High Plains, and isolated to scattered thunderstorms are forecast in the central and northern Intermountain West, including possible severe thunderstorms in southern Montana. Flood Watches and Warnings will continue across parts of Alaska, especially in the Interior, for snowmelt, and showers are likely along the southern Alaska coast into the Brooks Range and parts of the Interior.

## National Predictive Services Outlooks

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Escape Routes 3
