

**Incident Management Situation Report
Tuesday, May 30, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (135 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires: **	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there are three fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Seventeen fire suppression crews, three incident management teams and thirty-three overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	2	327	0	0	0	1	-3

Ten Year Average	Total
Fires (2013 – 2022 as of today)	21,419
Acres (2013 – 2022 as of today)	1,001,887

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

High pressure will bring well above normal temperatures to the Great Lakes, Ohio Valley, Northeast, and Mid-Atlantic along with minimum relative humidity as low as 15%. Breezy south winds are forecast across portions of Wisconsin as well with moderate significant fire potential. Very dry conditions will continue over the Southwest, southern Great Basin, and West Slope, with afternoon relative humidity as low as 5% and poor overnight recovery. Breezy south to southwest wind will create elevated fire weather conditions across much of Arizona and western New Mexico. Scattered showers and thunderstorms will develop from the Sierra through the northern Great Basin into the northern Rockies, on much of the Plains, and western Mississippi Valley. Severe thunderstorms are likely in eastern Colorado into western Kansas and Nebraska. Scattered showers and thunderstorms will develop across south Florida, and from the southern Appalachians to the Mid-Atlantic and Southeast coasts. Low pressure will bring continued cool and showery conditions to much of Alaska.
