

**Incident Management Situation Report
Wednesday, October 11, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (79 fires)
New large incidents:	1
Large fires contained:	2
Uncontained large fires: **	14
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1
Complex IMTs committed:	1

Nationally, there are five fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion:

West to southwesterly sustained winds of 15-30 mph with gusts 35-50 mph amid relative humidity of 10-25% will create areas elevated conditions across much of the Great Basin, Desert Southwest, and greater Four Corners. Breezy southerly winds of 15-25 mph will develop across portions of the southern High Plains as well. Widespread showers and isolated thunderstorms will continue across the Pacific Northwest into the northern Great Basin and northern and central Rockies, with snow levels as low as 6,000 feet. Surface low pressure associated with deep subtropical moisture will move along the northern Gulf Coast and bring heavy rain to the northern Gulf Coast into the Southeast and Florida. Below normal temperatures will continue across the Great Lakes and Northeast, with fewer showers downwind of the lakes today.
