

**Incident Management Situation Report
Friday, February 23, 2024 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (February 16, 2024 – February 22, 2024):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (821 fires)
New large incidents:	11
Large fires contained:	5
Uncontained large fires: **	6
NIMOs committed:	0
Type 1 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Fire Activity and Teams Assigned

Totals

New fires:	628
New large incidents:	11
Uncontained large fires:	6

- * **Bryant Creek**, Oklahoma DOF. Four miles northeast of Peggs, OK. Hardwood litter. Moderate fire behavior.
- * **Corral**, Oklahoma DOF. Thirty-one miles southeast of McAlester, OK. Hardwood litter and grass. Minimal fire behavior. Structures threatened.
- * **Moore Hollow**, Virginia DOF. Twenty-four miles east of Ewing, VA. Timber and hardwood litter. Active fire behavior with running and flanking. Residences threatened.
- * **Spring Creek Road**, Oklahoma DOF. Six miles east of Mill Creek, OK. Timber and brush. Moderate fire behavior with wind-driven runs. Structures threatened.
- * **Radar**, Florida Forest Service. Ten miles southwest of Fort Meade, FL. Southern rough. Minimal fire behavior with smoldering.
- * **Chewalla Creek**, National Forests in Mississippi, USFS. Seven miles northeast of Holly Springs, MS. Timber. Moderate fire behavior with smoldering, creeping and running.

Acres (2014 – 2023 as of today)	80,619

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A cold front will move off the East Coast today and tonight with light precipitation for the Northeast and Mid-Atlantic. Breezy and dry post-frontal winds will develop this weekend behind the front. Mild and dry conditions are forecast across the West today and tomorrow, before a storm moves into the West from the Gulf of Alaska Sunday into early next week. Widespread precipitation is forecast, with snow levels falling as low as 1,000 feet near the Canadian border and 4,000 feet in the Southwest by early next week. Strong westerly winds and low relative humidity are likely across New Mexico into the southern/central High Plains as well, where elevated to critical conditions are possible. As the storm moves east, widespread precipitation will develop across the Mississippi Valley to the East Coast mid to late next week, with snow in portions of the Upper Mississippi Valley and northern Great Lakes, while another storm brings more rain and snow to the northwestern US. Southwest Alaska will remain unsettled well into next week, while periodic light precipitation affects the rest of the state. Trade winds are forecast to increase across Hawai'i early next week and become strong, but moisture will also increase with frequent windward showers and occasional leeward showers.
