## **Predictive Services Discussion:**

Hot temperatures are forecast across much of the West, with record-setting temperatures in California and southwest Oregon and well above normal values across the rest of the Northwest into the central/western Great Basin and Arizona. Very dry air is forecast across the Intermountain West where minimum relative humidity will fall below 15% and overnight recovery will remain poor, especially for mid-slopes and ridges. Winds are generally expected to be light, but locally breezy northwesterly winds will continue in the Coast Ranges of California into portions of the Snake River Plain.

Isolated thunderstorms will develop along the High Plains from eastern Montana to eastern New Mexico, although a few storms are possible as far west as the Divide in New Mexico. A cold front stretching from Texas to the Great Lakes will slowly move south and east, with scattered showers and thunderstorms. Cool, wet weather will continue across Interior Alaska, spreading into south-central Alaska during the day.
