

**Incident Management Situation Report
Monday June 17, 2024 – 0730 MDT
National Preparedness Level 2**

National Fire Activity (June 14, 2024 – June 16, 2024):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (317 fires)
New large incidents:	12
Large fires contained:	5
Uncontained large fires:	17
CIMTs committed:	1
Type 1 IMTs committed:	1
NIMOs committed:	0

Nationally, there are eight fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Predictive Services Discussion:

A trough of low pressure deepens over the western United States today, keeping temperatures well below normal for the northwestern states. A chance of scattered showers is forecast for much of the area with snow possible for the high elevations of Central Idaho and Western Montana. A higher likelihood for thunderstorms and wetting rain exists across the Northern and Central Great Plains and into the Great Lakes region as well as across parts of the Gulf Coast north into the Tennessee River Valley. Seasonably normal temperatures will persist over much of the Southwest where elevated to critical fire weather conditions are predicted for most of Arizona, the southern Great Basin, western New Mexico and far southern California due to an increase in southwesterly flow and low relative humidity. Portions of the southern Sierra Nevada and western Nevada will also reach critical levels due to strong winds and poor overnight humidity recoveries. Well above normal temperatures are anticipated for the central Plains, upper Midwest and into the Ohio Valley. Conditions will be warm and dry across the interior of Alaska today, with the potential for showers and thunderstorms limited mainly to south central and southwest Alaska.
