

**Incident Management Situation Report
Friday, April 11, 2025 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (April 4, 2025 – April 10,2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (452 fires)
New large incidents:	4
Large fires contained:	14
Uncontained large fires:	1
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

TOTAL ACRES:		93,799	653	31,358	2,928	631,357	62,853	822,951

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	11,792
Acres (2015 – 2024 as of today)	737,978

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Anomalously warm and dry conditions are forecast through next week across the Desert Southwest, southern Great Basin, West Slope, and portions of the adjacent High Plains, with minimum relative humidity below 15% and poor overnight recovery below 30%. In addition, breezy and dry southwest winds will develop this weekend across the Southwest into the central and southern High Plains creating elevated to critical fire weather conditions. A cold front will move through the northern third of the West today and tomorrow with light precipitation, but temperatures will warm to above normal next week. As the front moves into the northern Plains, more widespread moderate precipitation is expected from central Montana through North Dakota and northern Minnesota. However, the front will be much drier as it traverses the Mississippi Valley, Appalachians, and East Coast early next week with only scattered light rainfall. Breezy and dry northwesterly winds will develop behind the front, with areas of elevated conditions Monday across portions of the Plains, and in the Southeast mid-next week, mainly in areas where green-up has not fully commenced. Periods of precipitation will continue across southern and western Alaska into early next week, while breezy trade winds continue into early next week with scattered windward showers and isolated leeward showers.
