

Incident Management Situation Report
Friday, August 8, 2025 – 0730 MDT
National Preparedness Level 4

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (79 fires)
New large incidents:	4
Large fires contained:	2
Uncontained large fires:	35
CIMTs committed:	13
NIMOs committed:	0

Nationally, there are Five fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Five fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

Elk RBX, Rio Blanco County, CO. CIMT (RM Team 3). CIMT is also managing the Lee incident. Ten miles southeast of Meeker, CO. Grass, brush and timber. Active fire behavior with crowning, short crown runs and wind-driven runs. Community of Meeker threatened. Evacuations, area, road and trail closures in effect. Sage-grouse habitat threatened.

Lee, White River Field Office, BLM. Eleven Miles southwest of Meeker, CO. Grass and brush. Extreme fire behavior with crowning, short-crown runs and wind-driven runs. Community of Meeker and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Turner Gulch, Grand Junction Field Office, BLM. CIMT (NR Team 2). Eight miles northeast of Gateway, CO. Timber, brush and grass. Active fire behavior with group torching, wind-driven runs and uphill runs. Community of Gateway threatened. Area, road and trail closures in effect.

Stoner Mesa, San Juan NF, USFS. Eleven miles northeast of Dolores, CO. Timber. Active fire behavior with group torching, short-range spotting and backing. Structures threatened.

Twelve, Moffat County, CO. Three miles northeast of Elk Springs, CO. Grass and brush. Moderate fire behavior with isolated torching, creeping and short-range spotting. Area and road closures in effect.

Waters Canyon, Ute Mountain Agency, BIA. Fourteen miles southwest of Mancos, CO. Timber and medium slash. Minimal fire behavior with smoldering and torching. Structures threatened. Road closures in effect.

Leroux, Uncompahgre Field Office, BLM. Five miles north of Hotchkiss, CO. Brush and grass. Minimal fire behavior with creeping and smoldering. Area and road closures in effect.

South Rim, Black Canyon of the Gunnison NP, NPS. Nine miles east of Montrose, CO. Brush, timber and grass. Minimal fire behavior with smoldering and creeping. Area, road and trail closures in effect.

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	35,620
Acres (2015 – 2024 as of today)	4,238,361

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A cold front in the West will push into the central Great Basin and central Rockies, with strong, dry west to southwest winds creating critical conditions ahead of the front from southeast Nevada and northern Arizona into much of Utah and the central Rockies. Low relative humidity of 3-15% and poor overnight recovery will persist across the southern Intermountain West, as well. As the front moves through northern Utah, southwest Wyoming, and northwest Colorado in the late afternoon and evening, a wind shift to the north is expected. Isolated dry thunderstorms will develop from the Mogollon Rim to southwest Colorado and northern New Mexico. Isolated mixed wet/dry thunderstorms will develop across southeast Arizona into southwest New Mexico.

Above normal temperatures and very dry conditions will persist in southern California and begin to spread northward into northern California. In the northern half of the West, below normal temperatures with moderate relative humidity. Hot, dry, and breezy conditions are expected to increase across North Texas and central and western Oklahoma. Scattered showers and thunderstorms are expected in the Midwest and much of Florida, with more isolated thunderstorms into the Southeast. Dry conditions will persist in the Northeast overall in the Northeast, but isolated thunderstorms are possible in northern New England. Cooler conditions are expected across most of Alaska today, with showers for the western half of the state.
