

**Incident Management Situation Report
Sunday, August 10, 2025 – 0730 MDT
National Preparedness Level 4**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (95 fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires:	33
CIMTs committed:	13
NIMOs committed:	0

Nationally, there are five fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Five fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

Predictive Services Discussion:

West to northwesterly winds of 10-25 mph with gusts 25-35 mph amid RH of 5-12% will persist across the Greater Four Corners area, creating elevated conditions. Lighter winds, but still dry conditions are expected across the rest of the Great Basin into the central Rockies.

Hot, above normal temperatures and low RH will spread across most of California and southern Oregon away from the coast with RH of 5-15% and poor overnight recovery, but winds will be light except in areas favored by terrain. Above normal temperatures build in the Pacific Northwest, with near normal temperatures continuing about the northern Rockies. Across these parts, minimum RH of 12-25% and light winds is expected.

A slight increase in monsoon moisture is expected near and south of the Mogollon Rim and into New Mexico, bringing a chance of isolated mixed wet/dry thunderstorms but isolated dry thunderstorms and new ignitions remain possible in northern Arizona and New Mexico.

Hot, dry, and breezy conditions will continue for the southern Plains, with moderate conditions persisting across parts of Texas and central/western Oklahoma. Scattered showers and thunderstorms are expected in the Midwest into the Southeast. Warm and dry conditions are expected in the Northeast, with minimum RH of 25-40%.
