

**Incident Management Situation Report
Wednesday, August 13, 2025 – 0730 MDT
National Preparedness Level 4**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (59 fires)
New large incidents:	2
Large fires contained:	3
Uncontained large fires:	28
CIMTs committed:	13
NIMOs committed:	0

Nationally, there are six fires being managed under a strategy other than full suppression. One fire is in Alaska. Five fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

Predictive Services Discussion:

Above normal temperatures continue and breezy winds develop in the Pacific Northwest as the ridge breaks down, with generally westerly winds of 10-25 mph and gusts of 30-45 mph amid minimum RH of 10-15% away from the coast focused on the east slopes of the Cascades into the Columbia Basin, and modest overnight recovery.

Across the Great Basin and into the central Rockies, winds increase with southwest to northwesterly winds 10-20 mph with gusts of 20-40 mph amid RH of 7-15% and poor overnight recovery. For most of California away from the coast, hot, above normal temperatures and low RH continue, with RH of 7-15% and poor overnight recovery. Winds will be mostly light except in areas favored by terrain.

Monsoon moisture lies over much of Arizona and into New Mexico and the central Rockies, with a slight increase in upper moisture across inland parts of the West, bringing a chance of isolated mixed wet/dry thunderstorms with gusty outflows across the Southwest, as well as parts of the Great Basin and around the central Rockies - isolated dry thunderstorms and new ignitions remain possible in those parts. Elsewhere, scattered showers and thunderstorms are expected across much of the east, south, and Great Plains.
