

**Incident Management Situation Report**  
**Saturday, August 16, 2025 – 0730 MDT**  
**National Preparedness Level 4**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (86 fires)
New large incidents:	8
Large fires contained:	2
Uncontained large fires:	47
CIMTs committed:	16
NIMOs committed:	0

Nationally, there are five fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Five fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

**[Understanding the IMSR](#)**

**[IMSR Map](#)**

Two MAFFS C-130 airtankers and support personnel have been deployed to Colorado Springs, CO and two MAFFS C-130 airtankers and support personnel have been deployed to Mesa, AZ to support wildland fire operations nationally. ## **Predictive Services Discussion:**

Showers are expected in the Northwest west of the Cascades, with isolated to scattered showers and thunderstorms developing from northern California into northeast Oregon and west-central Idaho. Wetting rain is most likely west of the Cascades, with more localized wetting rain east of the Cascades into central and northern Idaho. Farther south and east, breezy southwesterly winds will continue across the central and Great Basin into southwest Montana amid relative humidity of 10-20%. The strongest winds gusting to 40 mph are likely along the Sierra Front creating elevated to critical conditions, with more localized elevated conditions from eastern Nevada to southwest Montana. Isolated to scattered mixed wet and dry thunderstorms will also develop across east-central/southeast Idaho into southwest Montana and western Wyoming. Monsoon moisture will begin to wane across Arizona into Utah and the West Slope where isolated to scattered mainly wet thunderstorms are expected. Moisture will remain deep in New Mexico where scattered showers and thunderstorms are likely, while cooler onshore flow will persist in central and southern California.

Elsewhere, breezy and dry southerly winds will persist on the southern Plains amid above normal temperatures and relative humidity as low as 15%. Scattered showers and thunderstorms are expected across the northern Plains and Midwest along a cold front, with more isolated thunderstorms from the Lower Mississippi Valley to the Southeast. Dry conditions will persist in the Northeast.
