Isolated to scattered showers and thunderstorms will persist in New Mexico and east of the Divide in Colorado, but isolated mixed wet and dry thunderstorms are possible in eastern Arizona and the West Slope.

For the southern Plains, southerly winds weaken with higher relative humidity and isolated thunderstorms expected over the High Plains. A cold front will push from the Midwest into the Northeast with scattered showers and thunderstorms bringing some relief to New England, but not all areas will receive rain. Isolated showers and thunderstorms are also expected along the Gulf Coast.
