

**Incident Management Situation Report
Monday, August 25, 2025 – 0730 MDT
National Preparedness Level 4**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (97 fires)
New large incidents:	8
Large fires contained:	2
Uncontained large fires:	50
CIMTs committed:	18
NIMOs committed:	0

Nationally, there are five fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Five fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Hot, dry, and unstable conditions continue along much of the West Coast near and west of the Cascades and Sierra as near record-setting temperatures 10-25°F above normal remain likely. Low RH of 10-20% is expected in much of California, the Inland Northwest. Scattered mixed wet/dry thunderstorms are expected across the Sierra and Cascades, extending to the northern part of the monsoonal moisture across parts of inland Oregon, southern Idaho, and western Wyoming.

Monsoon moisture continues to deepen over the Southwest with scattered showers and thunderstorms. Monsoonal moisture begins to push into the northern Great Basin, bringing higher RH, cooler conditions, and cloud cover. Isolated to scattered mixed wet/dry thunderstorms expected across much of the Great Basin into the West Slope

Elsewhere, isolated showers and thunderstorms are possible across the southeast and the central Great Plains, as well as parts of New England.
