

Incident Management Situation Report
Saturday, August 30, 2025 – 0730 MDT
National Preparedness Level 3

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (60 fires)
New large incidents:	1
Large fires contained:	3
Uncontained large fires:	38
CIMTs committed:	19
NIMOs committed:	0

Nationally, there are 10 fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Ten fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

Predictive Services Discussion:

Monsoon moisture will exit the West on Saturday with showers and thunderstorms pushing east into the Central Plains. Minimum RH will continue its slow decline across the West falling to the low teens in California and the Inland Northwest, but minimums are likely to remain in the low 20% for the central/eastern Great Basin and Rockies. Temperatures will gradually warm to near to above normal across the Inland Northwest and Northern California with areas further east still struggling to hit normal. Winds are expected to remain generally light across the West as the ridge of high pressure expands northward.

In the eastern US, cooler/drier conditions are expected in the northern tier behind Friday's cold front. RH will remain elevated in the Northeast but could be as low as 30% from the Mid-Atlantic to the Ohio/Tennessee Valleys. Scattered thunderstorms will develop on the Plains, with the focus on North Texas, then extend along the Gulf Coast into Florida. South Texas is expected to remain dry.
