

**Incident Management Situation Report  
Friday, December 26, 2025 – 0730 MDT  
National Preparedness Level 1**

**National Fire Activity (December 19, 2025 – December 25, 2025):**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (222 fires)
New large incidents:	8
Large fires contained:	5
Uncontained large fires:	3
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

**This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.**

**Totals**

New fires: 165  
 New large incidents: 8  
 Uncontained large fires: 3

\* **Addington**, Oklahoma DOF. Two miles north of Paradise Hill, OK. Timber. Minimal fire behavior. Last report unless significant activity occurs.

\* **Burning In The Blind**, Texas A&M Forest Service. Started on private land 10 miles south of Falfurrias, TX. Grass and brush. Active fire behavior with running and smoldering. Last report unless significant activity occurs.

\* **Mistletoe**, Texas A&M Forest Services. Started on private land seven miles southeast of Amarillo, TX. Grass. Moderate fire behavior. Last report unless significant activity occurs.

**Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

A fast-moving storm will move through the Northeast and Mid-Atlantic today, with mixed precipitation and snow, with rain on the southern extent from the Upper Ohio Valley to North Carolina. Meanwhile, a deep storm will move through the West today and tomorrow with valley rain and mountain snow, with the heaviest snow falling in the Sierra and central Rockies. As this storm moves onto the Plains, it will push a strong but mainly dry cold front southward this weekend, with areas of elevated conditions in breezy northerly winds behind the front on the southern Plains. As the storm continues to move east into Monday, it will redevelop and strengthen over the Great Lakes and Northeast with mixed precipitation, while light to moderate rain falls in the Ohio and Tennessee Valleys to the Carolinas. Breezy and dry northerly winds behind the cold front may bring areas of elevated conditions to the northern Gulf Coast Tuesday. After the storm moves through the West, a drier period is expected with strong valley inversions while mountain temperatures are above normal much of next week. An upper-level low may move into southern California and the Southwest late next week with showers, with a weak atmospheric river into the Northwest. Very cold temperatures will persist across Alaska for the next week with local areas of snow, and gusty winds for south-central Alaska. Trade winds will weaken across Hawai'i this weekend with isolated showers, with more uncertainty next week with a potential transition to a wetter pattern.
