Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

## **Predictive Services Discussion:**

Strong northeasterly Santa Ana winds gusting to 60 mph amid relative humidity of 5-15% will continue in southern California this morning, with winds diminishing in the afternoon. Dry conditions will continue through the weekend, with offshore northeasterly winds continuing to gust to 40 mph in favored locations, while minimum relative humidity is forecast to remain above 10% this weekend. A fast-moving storm will move through the northern half of the West today and tomorrow, with light to moderate precipitation and snow levels of 2,000 to 4,000 feet. This storm will move from the northern Plains Saturday night into the Great Lakes and bring light to moderate snowfall and areas of blowing snow. A strong winter storm will move through the Southeast today into tomorrow, as well, with heavy snow and icing from Arkansas through the Ohio and Tennessee Valleys into the Mid-Atlantic. Light snow is also expected to fall across portions of the Northeast, mainly on Saturday.
