

**Incident Management Situation Report
Saturday, January 25, 2025 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (49 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:	4
CIMTs committed:	0
Type 1 IMTs committed:	2
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Eight MAFFS C-130 airtankers and support personnel have been deployed to Port Hueneme, CA to support wildland fire operations in southern California. Their respective units are as follows: 153rd Airlift Wing (WY Air National Guard), 302nd Airlift Wing (CO Air Force Reserve), 146th Airlift Wing (CA Air National Guard), and 152nd Airlift Wing (NV Air National Guard).

Two crews and two overhead personnel from Alberta, Canada, and one crew and one overhead personnel from British Columbia, Canada have been deployed to southern California to assist with wildland fire operations.

Two CL-415 aircraft from Quebec, Canada have been deployed to southern California to assist with wildland fire operations.

Fire Activity and Teams Assigned

Totals

New fires:	16
New large incidents:	1
Uncontained large fires:	4
Type 1 IMTs committed:	2

* **Border 2**, San Diego Unit, Cal Fire. IMT 1 (Cal Fire Team 4). Six miles east of Otay Mesa, CA. Chaparral, grass and brush. Moderate fire behavior with uphill runs, wind-driven runs and short-range spotting. Community of Chula Vista and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Hughes, Angeles NF, USFS. Six miles northeast of Castaic, CA. Chaparral, brush and grass. Minimal fire behavior with creeping and smoldering. Numerous structures and infrastructure threatened. Area, road and trail closures in effect.

Palisades, Los Angeles Fire Department. IMT 1 (Cal Fire Team 2). Four miles west of Brentwood, CA. Chaparral, brush and grass. Minimal fire behavior with smoldering. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Eaton, Los Angeles County Fire Department. Four miles northeast of Pasadena, CA. Grass, chaparral and timber. Minimal fire behavior with smoldering. Structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	1,084
Acres (2015 – 2024 as of today)	14,300

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Southwesterly onshore winds will increase Saturday in southern California, but relative humidity will remain low in the mountains. Widespread showers will spread across southern California Sunday, with snow levels as low as 3,000 feet. Breezy and dry southwesterly winds are expected in Arizona Saturday, followed by increasing moisture Sunday and a chance of showers. Cool and dry conditions are expected across the northern half of the West. The central and northern Plains will be slightly above normal and dry, while lake effect snow showers are expected in the Great Lakes. A warming trend is expected in the Southeast, while showers are expected across East Texas and the Lower Mississippi Valley this weekend. The strong storm will continue to move through Alaska, with locally very strong winds expected. Heavy snow is likely across the Alaska Range and the central Interior, with very cold air spreading into western Alaska and the North Slope behind the storm Sunday. Breezy trade winds will continue across Hawai'i, and increasing moisture will result in more widespread windward showers.
