

**Incident Management Situation Report
Sunday, January 26, 2025 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (52 fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:	4
CIMTs committed:	0
Type 1 IMTs committed:	2
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

TOTAL ACRES:		2,059	15	132	18	37,680	17,592	57,497

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	1,073
Acres (2015 – 2024 as of today)	15,937

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Widespread showers will spread across southern California today, with snow levels as low as 3,000 feet and several inches of snow in the mountains. Breezy and dry southwesterly winds are expected in Arizona, but relative humidity will be higher today with a chance of showers overnight in western Arizona. Breezy and dry westerly winds will spread across the northern Plains bringing above normal temperatures, while lighter winds are forecast in the southern Plains. Scattered snow showers will move through the Great Lakes and Northeast, while showers and thunderstorms develop across East Texas and the Lower Mississippi Valley. A strong storm will continue to move through Alaska, with strong winds and heavy rain along the south coast, while Arctic cold front brings heavy snow to southwest Alaska and the central/western Interior. Breezy trade winds will continue across Hawai'i, with scattered to widespread windward showers.
