

**Incident Management Situation Report
Wednesday, January 29, 2025 – 0730 MDT
National Preparedness Level 1**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (57 fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:	3
CIMTs committed:	0
Type 1 IMTs committed:	1
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Two crews and two overhead personnel from Alberta, Canada, and one crew and one overhead personnel from British Columbia, Canada have been deployed to southern California to assist with wildland fire operations.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	0	0	0	0	0	0	0
NWCC	0	0	0	0	0	0	0

TOTAL FIRES:		72	9	6	3	1,649	85	1,824
TOTAL ACRES:		2,106	15	132	84	39,707	17,595	59,640

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	1,222
Acres (2015 – 2024 as of today)	17,836

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Breezy and dry northwesterly winds will develop on the east slopes of the Appalachians to the Mid-Atlantic and Southeast coast today, with peak gusts to 60 mph are forecast amid relative humidity of 20-40%. Winds will diminish in the evening and overnight, with light winds but lower humidity continuing tomorrow. Light snow will continue across the Northeast during the day, with areas of blowing snow due to gusty northwesterly winds, ending overnight. An upper-level low will bring showers and isolated thunderstorms to the Southwest and Four Corners today, with snow levels of 4,000 to 6,000 feet and heavy snow expected in the Sangre de Cristo Mountains. This system will also draw moisture northward from the Gulf of Mexico, with light snow likely on the central High Plains into Thursday, while widespread showers and scattered thunderstorms develop from eastern Kansas to central and East Texas. These showers and thunderstorms will spread eastward into the Ohio Valley, Appalachians, and Southeast tomorrow. Near seasonable temperatures are expected in the northern half of the West today, but an atmospheric river will begin to make landfall in the Northwest tomorrow night bringing rain and mountain snow. Very cold air will continue across Alaska today, and spread into the panhandle, with temperatures as low as -40°F in the Interior through tomorrow. Strong low pressure affect Hawai'i tonight and tomorrow, with strong south to southwesterly winds, areas of heavy rain, and a few severe thunderstorms.
