## **Predictive Services Discussion:**

Temperatures moderate over western portions of the Pacific Northwest as heat moves to the inland Pacific Northwest and Northern Rockies on Wednesday. East of the Cascades, critically hot, dry, and windy conditions will develop, especially in the Cascade gaps. A mix of wet and dry thunderstorms will kick off early this morning across the western Great Basin, inland Pacific Northwest, western Wyoming and western Montana. Throughout the afternoon, showers and thunderstorms will significantly increase in coverage across the Southwest, Great Basin, and into the Rockies, with outflow wind gusts of 20-30 mph common. Some strong storms may develop across eastern Oregon, central Idaho, Montana, and the western Dakotas as well as the Great Lakes, with outflow winds up to 60 mph possible. Gusty winds will also develop east of the Front Range. A warming and drying trend continues across the Alaska Interior, with isolated showers and thunderstorms remaining possible in the eastern Interior and eastern Brooks Range.
