

Incident Management Situation Report
Friday, July 25, 2025 – 0730 MDT
National Preparedness Level 4

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (61 fires)
New large incidents:	2
Large fires contained:	0
Uncontained large fires:	33
CIMTs committed:	14
NIMOs committed:	1

Nationally, there are 19 fires being managed under a strategy other than full suppression. Sixteen fires are in Alaska. Three fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

Two MAFFS C-130 airtankers and support personnel have been deployed to Klamath Falls, OR to support wildland fire operations nationally. Respective units are from the 302nd Air Wing (Peterson Space Force Base, CO) and 146th Airlift Wing (CA Air National Guard).

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

New large incidents:	1
Uncontained large fires:	11
CIMTs committed:	4
NIMOs committed:	1

Burdoin, Southeast Region, Washington DNR. CIMT (NW Team 13). CIMT is also managing the Snyder Canyon incident. Five miles west of Lyle, WA. Timber and grass. Moderate fire behavior with running, torching and uphill runs. Communities of Lyle and High Prairie, energy and railroad infrastructure threatened. Evacuations, area and road closures in effect.

* **Snyder Canyon**, Southeast Region, Washington DNR. Three miles northwest of Klickitat, WA. Timber and grass. Moderate fire behavior with running, torching and uphill runs. Communities of Klickitat and Appleton threatened. Evacuations in effect.

Butte Creek, Warm Springs Agency, BIA. CIMT (NW Team 3). CIMT is also managing the Cram incident. Five miles northeast of Simnasho, OR. Grass, timber and brush. Minimal fire behavior with creeping and smoldering. Community of Simnasho threatened. Area and road closures in effect.

Cram, Prineville District, BLM. Started on private land 15 miles north of Madras, OR. Grass, timber and brush. Minimal fire behavior with creeping and smoldering. Numerous structures and energy infrastructure threatened. Evacuations and road closures in effect.

Lake Spokane, Northeast Region, Washington DNR. CIMT (NW Team 2). Started on private land 12 miles northwest of Spokane, WA. Timber. Moderate fire behavior with backing, flanking and isolated torching. Numerous structures, communication infrastructure threatened. Evacuations and road closures in effect.

Pomas, Okanogan-Wenatchee NF, USFS. CIMT (NW Team 10). Thirty-six miles northwest of Entiat, WA. Timber and grass. Moderate fire behavior with backing, creeping and isolated torching. Communication infrastructure threatened. Area, road and trail closures in effect.

Bear Gulch, Olympic NF, USFS. NIMO. Ten miles northwest of Hoodspport, WA. Timber. Active fire behavior with isolated torching, creeping and smoldering. Area, road and trail closures in effect.

Hope, Northeast Region, Washington DNR. Started on private land 15 miles north of Kettle Falls, WA. Timber, closed timber litter and brush. Minimal fire behavior with smoldering, creeping and isolated torching. Area, road and trail closures in effect.

Hagelstein, Klamath Unit, Oregon DOF. Four miles southeast of Modoc Point, OR. Timber, light slash and brush. Minimal fire behavior with smoldering. Area and road closures in effect.

Board Shanty, Grants Pass Unit, Oregon DOF. One mile south of Grants Pass, OR. Timber and brush. Minimal fire behavior with smoldering and creeping. Numerous structures and communication infrastructure threatened.

Elk, Klamath Unit, Oregon DOF. Seven miles southwest of Beatty, OR. Timber and closed timber litter. Minimal fire behavior with smoldering. Area and road closures in effect. Last report unless significant activity occurs.

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	32,281
Acres (2015 – 2024 as of today)	3,552,735

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Abundant lightning and erratic outflow winds will accompany thunderstorm activity in parts of the northwestern U.S. again today. Temperatures will trend above average throughout most of the Rocky Mountains with a notable decrease in monsoonal moisture and cloudiness, while readings will be near to below average closer to the West Coast. Otherwise, breezy conditions and a persistently bone-dry air mass will maintain accelerated drying of fuels in the Intermountain West. Heavy rain and a few severe storms will affect the Gulf Coast and areas along a front from the Central Plains to New England.

Isolated dry thunderstorms will spread to the northwest from the central Sierra into northern California this morning, before becoming much more numerous and trending wetter in the afternoon. Mixed wet/dry thunderstorms will extend into the rest of northern Nevada, southeast Oregon, southwest through central Idaho and southwest Montana this afternoon and evening, as well. Cloud-to-ground lightning counts will trend higher than on Thursday. Isolated dry thunderstorms are also expected either side of the Divide in Colorado and northern New Mexico, with most of the wetter storms and deeper monsoonal moisture drifting east of there into the High Plains from Montana to West Texas.

Poor moisture recovery in the central and southern Intermountain West will lead to an afternoon with widespread single-digit minimum humidity values. Most of the region will also see the start of a breezier period, with southwesterly gusts from 25-40 mph resulting in wind-driven fire growth. Ventilation rates will increase for established large fires from northern Arizona into Utah, while lightning holdover fires could emerge in these conditions, as well. Meanwhile, westerly Cascade gap winds gusting from 30-40 mph will persist in the Northwest, where temperatures will be a few degrees milder than today. Fire concerns will be low throughout Alaska.
