

**Incident Management Situation Report
Tuesday, June 10, 2025 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (129 fires)
New large incidents:	4
Large fires contained:	2
Uncontained large fires:	5
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.
Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

One U.S. Forest Service contracted large airtanker, one incident management teams, eight fire suppression crews and 55 overhead personnel are assigned to large fire support in Canada.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

TOTAL ACRES:		103,319	15,721	39,816	20,811	938,788	133,779	1,252,235

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	22,665
Acres (2015 – 2024 as of today)	1,298,664

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Well above normal temperatures will continue across the northern Intermountain West with minimum relative humidity as low as 10% in the lower elevations. Breezy westerly winds gusting to 40 mph are expected into the Cascade gaps into the Columbia Basin creating elevated conditions. Isolated to scattered mixed wet and dry thunderstorms will develop across northern California into southern and eastern Oregon and the northern Great Basin, with isolated drier thunderstorms expected overnight. Isolated dry thunderstorms will develop in the Greater Four Corners, while very hot and dry conditions continue in the Sonoran Desert as temperatures exceed 100°F and relative humidity falls to the single digits. Scattered, mainly wet, thunderstorms will develop across the eastern Plains of New Mexico, with more widespread thunderstorms from central and South Texas eastward along the Gulf Coast. The heaviest rain is expected across central Texas where flooding is possible and a few severe thunderstorms are likely to occur, as well. A warmer and drier trend will begin across much of Alaska with the warmest temperatures in the western Interior. Light to moderate trade winds are expected across Hawai'i today with continued dry conditions and only a few light windward showers.
