

Incident Management Situation Report
Wednesday, June 11, 2025 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (89 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires:	4
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.
 Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

One U.S. Forest Service contracted large airtanker, two incident management teams, 14 fire suppression crews and 66 overhead personnel are assigned to large fire support in Canada.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	0	0	0	0	0	0	0
NWCC	3	2,768	8	21	0	216	41
ONCC	1	19	3	16	1	170	0
OSCC	0	0	0	0	0	0	-1

SACC	2	7,505	0	2	1	14	0
Total	13	49,787	30	67	13	1,154	28

Southwest Area (PL 2)**Fire Activity and Teams Assigned****Totals**

New fires:	7
New large incidents:	0
Uncontained large fires:	1

Ranch, Southeast District, Arizona DOF. Twenty miles east of Nogales, AZ. Brush and grass. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

Basin, Coconino NF, USFS. Twenty miles northwest of Flagstaff, AZ. Heavy slash and timber. Moderate fire behavior with creeping, flanking, and backing. Area closures in effect. Last narrative report unless significant activity occurs.

TOTAL ACRES:		103,448	17,831	23,498	20,811	939,731	133,891	1,239,209

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	22,825
Acres (2015 – 2024 as of today)	1,321,906

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Temperatures will continue above normal across the Intermountain West with minimum relative humidity as low as 10% in the lower elevations. Predominately westerly winds will develop across all areas west of the Continental Divide, with gusty winds expected through the Cascade gaps into the Columbia Basin and over much of the central Great Basin for elevated fire weather conditions. Ongoing isolated to scattered thunderstorm activity will continue across the southern Cascades and the northern Great Basin, shifting eastward through the day into the Northern Rockies by this evening. Storms will be a mix of wet and dry, with areas of heavy rain. Isolated dry thunderstorms will continue in western New Mexico and northeastern Arizona, while very hot, dry and breezy conditions continue in southern Californian through southeastern Arizona. Scattered, mainly wet, thunderstorms will persist across the eastern Plains of New Mexico, with more widespread thunderstorms from central and South Texas eastward along the Gulf Coast, as well as the central High Plains through the middle Mississippi Valley. Heavy rain and flash flooding are possible over the southern Great Plains. Seasonably warm and dry conditions remain across much of Alaska with the warmest temperatures in the western Interior. Moderate easterly trade winds and scattered, light showers are expected across Hawai'i.
