

**Incident Management Situation Report**  
**Thursday, June 12, 2025 – 0730 MDT**  
**National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (136 fires)
New large incidents:	7
Large fires contained:	0
Uncontained large fires:	10
CIMTs committed:	1
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.  
Uncontained large fires include only fires being managed under a full suppression strategy.

**[Understanding the IMSR](#)**

**[IMSR Map](#)**

One U.S. Forest Service contracted large airtanker, two incident management teams, 15 fire suppression crews and 69 overhead personnel are assigned to large fire support in Canada.

**This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.**

<b>Ten Year Average</b>	<b>Quantity</b>
<b>Fires (2015 – 2024 as of today)</b>	<b>22,947</b>
<b>Acres (2015 – 2024 as of today)</b>	<b>1,354,210</b>

**Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Isolated to scattered thunderstorm activity continues over the Northern Rockies and to a lesser degree in the central Idaho mountains and western Wyoming. Scattered showers are also expected over the Central to Northern Great Plains and upper Midwest as well as much of the Southeastern United States. Afternoon thunderstorm activity is also likely to develop in the central Rocky Mountains south into western New Mexico. Temperatures will reach up to 10 degrees above normal across much of the Great Basin, as well in Southern California and Southern Arizona where temperatures will exceed 100° F and relative humidity may reach 10% in the low elevations. Strong westerly flow will create downslope flow along the lee of the Sierra and the Cascades, creating elevated fire weather conditions in those areas in the afternoon. In Alaska, a widespread warming and drying trend will continue across the mainland, with gusty southerly winds forecast for the far western part of the state.
