

Incident Management Situation Report
Friday, June 13, 2025 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (134 fires)
New large incidents:	6
Large fires contained:	1
Uncontained large fires:	15
CIMTs committed:	2
Type 1 IMTs committed:	1
NIMOs committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.
Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

One U.S. Forest Service contracted large airtanker, three incident management teams, 15 fire suppression crews and 70 overhead personnel are assigned to large fire support in Canada.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

New fires:	36
New large incidents:	2
Uncontained large fires:	4
Type 1 IMTs committed:	1

Rowena, The Dalles Unit, Oregon DOF. IMT1 (ODF Team 2). Three miles northwest of The Dalles, OR. Grass, brush and light slash. Active fire behavior with single tree torching, spotting and wind-driven runs. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

* **Ferry**, Prineville District, BLM. Eleven miles east of Moro, OR. Grass and chaparral. Extreme fire behavior with uphill runs, wind-driven runs and group torching. Numerous structures and energy infrastructure threatened. Road closures in effect.

* **Vansycle Canyon**, Southeast Region, Washington DNR. Twelve miles southeast of Burbank, WA. Grass and brush. Moderate fire behavior with wind-driven runs. Structures and energy infrastructure threatened.

Sunny Side, Warm Springs Agency, BIA. Five miles north of Warm Springs, OR. Grass and brush. No new information.

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	23,085
Acres (2015 – 2024 as of today)	1,377,742

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Many areas of the West will experience warm and dry conditions, with temperatures reaching 5 to 10 degrees above normal across much of the Great Basin, Southwest, Southern California and into the Central Rocky Mountains. Relative humidity in the lower elevations will reach the single digits. Westerly flow will develop west of the Continental Divide and will align with terrain to create downslope flow along the lee of the Sierra and the Cascades, creating elevated fire weather conditions along the Colombia River Gorge and critical fire weather conditions in Western Nevada where fuels are more supportive of fire growth. Breezy conditions are also likely across the northern Great Basin and parts of the Southwest. The exception to the warm and dry conditions will be the northern Pacific Coast and along the Canadian border of Washington where scattered precipitation is expected, and temperatures will be near or below normal. Isolated thunderstorms and showers are possible in the high terrain of the Northern Rockies, and a slight chance for severe thunderstorms will extend from central Montana into the Texas Panhandle. More widespread precipitation will fall east of the Continental Divide with the highest amounts expected in the Lower Mississippi Valley and also in the Northern Great Plains and Upper Mississippi Valley. In Alaska, a widespread warming and drying trend will continue across the mainland, with gusty southerly winds forecast for the far western part of the state.
