

**Incident Management Situation Report**  
**Friday, June 20, 2025 – 0730 MDT**  
**National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (93 fires)
New large incidents:	6
Large fires contained:	1
Uncontained large fires:	13
CIMTs committed:	5
Type 1 IMTs committed:	1
NIMOs committed:	0

Nationally, there are 13 fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

Four incident management teams, 19 fire suppression crews and 109 overhead personnel are assigned to large fire support in Canada.

**This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.**

**Active Incident Resource Summary**

<b>Ten Year Average</b>	<b>Quantity</b>
<b>Fires (2015 – 2024 as of today)</b>	<b>24,503</b>
<b>Acres (2015 – 2024 as of today)</b>	<b>1,580,822</b>

**Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Temperatures will be above normal nearly nationwide, with the highest anomalies occurring over the central Plains where highs will be above 100°F. Much of the West will also experience low relative humidity and gusty, southwesterly winds by this afternoon, creating critical fire weather conditions over the Great Basin, western Colorado and much of the Southwest, while areas of elevated conditions will develop in and around the San Joaquin Valley. Most of California, the Northwest and into western Montana will have well below normal temperatures, with high temperatures below 70°F across the Northwest with scattered showers and thunderstorms, mainly west of the Cascades. Isolated to scattered showers and thunderstorms will also form over the Central Idaho Mountains and into the Northern Rockies, where storms will be wetter and more widespread. Showers are also likely over parts of the Midwest into the Great Lakes. Southerly flow will bring a slight chance of isolated showers and thunderstorms into New Mexico, mostly east of the Divide. Alaska will see well above normal temperatures, with most of the Interior reaching at least 80°F and scattered thunderstorms developing over the Interior.
