

Incident Management Situation Report
Monday, May 19, 2025 – 0730 MDT
National Preparedness Level 2

National Fire Activity (May 16, 2025 – May 18, 2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (162 fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires:	8
CIMTs committed:	2
Type 1 IMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.
 Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Eastern Area (PL 3)

Fire Activity and Teams Assigned

Totals

New fires:	6
New large incidents:	0
Uncontained large fires:	3
CIMTs committed:	1

Camp House, Two Harbors Region, Minnesota DNR. CIMT (EA Team 1). IMT is also managing the Jenkins Creek fire. Two miles northeast of Brimson, MN. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Evacuations, area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Jenkins Creek, Superior NF, USFS. Fifteen miles southeast of Aurora, MN. Brush, closed timber litter and timber. Active fire behavior with creeping, group torching and isolated torching. Residences threatened. Evacuations, area and road closures in effect.

Munger Shaw, Cloquet Region, Minnesota DNR. Two miles east of Elora Lake, MN. Timber and grass. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday.

TOTAL FIRES:		1,094	213	116	113	23,378	1,172	26,086
TOTAL ACRES:		100,715	1,174	39,221	10,385	834,817	120,720	1,107,034

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	19,062
Acres (2015 – 2024 as of today)	1,059,639

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Breezy west winds of 15-25 mph with gusts to 40 mph amid minimum relative humidity of 5-15% will develop across southern New Mexico into West Texas today, with critical conditions most likely in New Mexico where fuels are driest. Low relative humidity will return to Arizona today, but westerly winds will remain below 15 mph. Breezy and dry north winds are expected in the Sacramento Valley into the afternoon creating locally elevated conditions. Meanwhile, cool conditions will continue in the northern half of the West, with showers gradually ending in the Rockies. Surface low pressure will develop in the central Plains, with showers and thunderstorms developing ahead of a cold front, some of which will be severe, spreading into the Mid-Mississippi Valley. Breezy and dry east winds will develop across the Upper Great Lakes with the lowest relative humidity in northern Minnesota, but recent rainfall will help mitigate. Dry conditions will continue across Florida and South Texas, where well above normal temperatures will continue. In Alaska, scattered showers are expected, mainly near and south of the Alaska Range, while winds remain light overall.
